

Hayes Forest Services Limited (formerly Pat Carson Bulldozing Ltd.) has been actively working in the Alberni Region for over 34 years. Starting in 1968 with road building operations and 1972 with logging operations, we have been continuously active in the local economy. We are a key supplier to Weyerhaeuser (formerly MacMillan Bloedel Limited), and currently we directly employ over 40 Port Alberni residents and do business with over 70 local suppliers. There are a further 30 plus contract employees who rely on Hayes' operations.

Our work in the Region has been varied and includes Port Alberni town-based operations and more remote operations in the Region, which have been substantially Port Alberni supplied and staffed.
